Mr. WEBB declined to submit to any arbitration on the ground that there was no ground for arbitration. The Central had discharged for sufficient reason some of its employees and it would not

A Republican Senstor has introduced a resolution to appropriate \$300,000 for the erection of a monument to General GRANT provided his remains be transferred to Washington.

The breathless way in which the present Republican regime has depleted the Treasury surplus makes such a proposition doubly annoying. The attempt to raise a monument to the deceased General by popular subscription has not been as successful as could be desired, and the present unworthy shrine on Riverside Drive for his dust is an eloquent appea for more generosity in this matter.

But this does not seem sufficient reason for removing Gen. GRANT's remains to the capital and plucking the money required for a fitting monument to him there from the pockets of the people.

There are enough rich men who were friends and admirers of General Grant to supply the deficiency in the popular subscription to his monument, if need be, out of their own pockets. To raise the monument in the way proposed by the Republican Senator, would be to raise with it a lasting humiliation to the man whom the nation would honor.

JOHN BOYLE O'REILLY.

The sudden death of John Boyle O'REILLY, editor of the Boston Pilot, has removed a singularly beautiful character from a world which he adorned and benefited. five paces apart, and the imitation by these nimble gentlemen of the manners and customs of Paris journalists and other distinguished Frenchmen was completed by the failure of either to hit his mark.

It seems, however, that the affair of honor had a most unexpected and unique sequence. Among the witnesses of the biodiess contest were two apes. The similative faculities of quadrumance are well known, but the instance under notice is the first recorded in the history of the race.

Of course, being Paris monkeys, a higher degree of intelligence than is found among monkeys in any other city of the world was thirs.

Still it is a surprise to learn that they found pistods and cartridges, loaded the weapons and faced each other and first.

HER IDEA OF PARISIAN DRESS. A Japanese Lady Tries to Emulate Her Franch Neighbors.

A Japanese indy residing at Tokio, and oats and put them in a heap upon the counter.

"Fant," said be, "how many cata?"

The boy again jumped to his feet, de-youred the cats mentally, and instantly shouted the number. It took a long time to count them, but the number was again found to be correct. quite ignorant of the uress of European ladies, desired to array herself in Parisian attire, says the London Foguro. to count them, but the number was again found to be cerrect.

Next the father seized a half-filled pail of water and asked the boy: "How many cubic inches of water in the pail?"

The boy sized it up with his eyes and quickly shouted, "A hundred and six teen."

A care all computation proved the boy to be right. Other wonderful answers were given always in an excited manner.

After each and every successful answer the same doleful expression returned.

The upside-down arrangement was, somehow, mismulerstood. The lady put on the dress first and the other things as
